

/ Data Sheet

Air Jet Dust Collector - Model TBLM

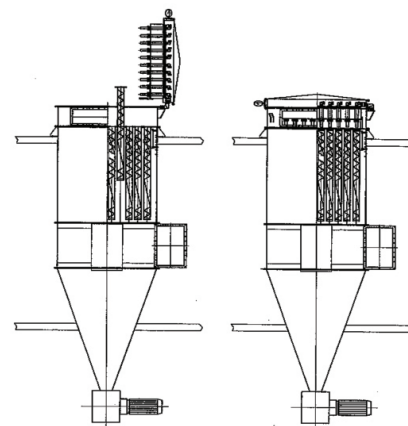

Product Features and Structure:

- Primary de-dust equipment in grain processing industry
- Modular design for a variety of series and models (low pressure, high pressure, ordinary, flip top)
- Updated design of air tank with leaking free
- Solenoid valve controlled compressed air blowback bag cleaning
- Innovated design of air blowback nozzle for air dynamic characteristics (Patent: ZL200920091844.6) for less restriction, high air flow speed and efficient outcome
- Programmable timer control for setting up pulse frequency and blowing time
- Flip top design enable quick maintenance and service
- Optional full funnel bottom cone for easy dust collection
- Optional supply with anti static or water proof cleaning bags
- Laser cutting applies to sheet metal components for quality and accuracy
- Carbon dioxide gas shielded welding workmanship
- CNC machining centres ensure precise fabrication
- Powder coated parts and components for best quality and duration

Technical Parameter

Spec. Model	Sleeve Length (mm)	Air Volume (m3/h)	Filtrating area (m2)	Air Lock motor Power (kW)	Cleaning Board Motor Power (kW)	Low Pressure Pump Model	Weight - A B C (kg)
TBLM-26	1800	1032-5160	17.2	0.75			710 573 672
	2000	1146-5730	19.1				749 663 705
	2400	1380-6900	23				794 920 730
