

/ Data Sheet

Bagging Machine - Model TDBZ

Product Features and Structure:

- A variety of series and models for a wide range of applications
- Dual auger feed mode for precise operations
- Vertical pneumatic actuated bag compact technology
- Integration of weighing, bag filling, conveying and sewing
- World top brand electric and pneumatic components
- Laser cutting applies to sheet metal components for quality and accuracy
- Carbon dioxide gas shielded welding workmanship
- CNC machining centres ensure precise fabrication
- Powder coated parts and components for best quality and duration

Technical Parameter

Spec. Model	Packing Range (kg/bag)	Capacity (bag/h)	Accuracy (%)	Power (kW)
DCS-10	10~25	160	±0.1	1.5 + 0.37 + 0.25
DCS-25	10~25	160	±0.1	1.5 + 0.37 + 0.25
DCS-50	25~50	180~240	±0.1	1.5 + 0.37 + 0.25
