

/ Data Sheet

Dual Rotor Dampener - Model FZSW

Product Features and Structure:

- Dual rotors extensive dampening unit for grain milling
- Optimize grain moisture conditioning in the milling process
- High throughput, low energy consumption and leaking free
- Dual rotors in horizontal arrangement for extensive mixing outcome
- Removable side cover for easy maintenance and service
- Heat treatment to rotor blades for long life time
- Laser cutting applies to sheet metal components for quality and accuracy
- Carbon dioxide gas shielded welding workmanship
- CNC machining centres ensure precise fabrication
- Powder coated parts and components for best quality and duration

Technical Parameter

Spec. Model	Speed (r/min)	Capacity (t/h)	Power (kW)	Water Adding
FZSW30-150	389 ± 5	12-16/16-24	5.5/7.5	≤7%
FZSW45-150	325 ± 5	25-35/35-45	11/15	≤7%
